

Concept QS Single Interline System

Now you're able to manufacture coil in-house, on demand In-House Manufacturing = 50% Material Cost Savings pre-punched book blocks.
For all types of plastic coil book production.

Customer benefits:

- In-house coil manufacturing interlined with automated coil insertion
- Coil produced and immediately conveyed into position for insertion into book
- Manufacture the coil you need - when you need it
- Free up valuable inventory floor space
- Coil forming capabilities - 6 mm to 30 mm (50 mm not available when interlining)
- One operator handles the entire setup
- Hands free coil placement dramatically speeds up binding productivity, 'Hot Start' feature allows the Former to stop & start with zero waste
- Operate in unison or detach when necessary for independent production
- Can be expanded to a Concept QS2 Dual Interline System

All performance outputs are based on 80 gsm paper and may vary depending on the product type, the working environment and the operator.

⁽¹⁾ Subject to the coil pitch used and machine model/configuration
- A4 (12") = 305 mm, A3 (17") = 430 mm.

Concept QS2 Dual Interline System

Add a 2nd 3000QS4 to your Single Interline System for maximum output. One Forming Machine interlined with 2 Auto Inserters. Double your productivity without doubling your cost.

Customer benefits:

- The first DUAL Interline system for plastic binding with two interlined PBS 3000QS4 Auto Coil Inserters keeping pace with the NCF6 Concept Formers' high speed production output
- All of the advantages of in-house coil manufacturing
- Bindery labor savings as high as 65%
- Modular design—Operate as a Dual Interline or operate with one Inserter inline and one Inserter offline to bind two different jobs at the same time.
- Maximize bindery productivity without the need to invest in a second forming machine
- Productivity ratings as high as 1400 books per hour!

All performance outputs are based on 80 gsm paper and may vary depending on the product type, the working environment and the operator.

⁽¹⁾ Subject to the coil pitch used and machine model/configuration
- A4 (12") = 305 mm, A3 (17") = 430 mm.
